

Bryant Santiago Paz Loeza

Merida, Mexico | bryantpaz7@outlook.com | +52 9992669725 | [Github](#) | [LinkedIn](#) | English Level B2 (CEFR)

Backend developer focused on Linux and process optimization; passionate about code logic and open-source software

Skills

Stack: JavaScript, TypeScript, Node, PostgreSQL, MongoDB, Python, Redis, Bash, Lua, SQLite, Go, C

Technologies: AWS, Linux, Git, Docker, Ansible, CI/CD, GitHub Actions, React, Prometheus, Grafana, Terraform

Experience

Full Stack JavaScript Developer, [Wellbe](#), Merida, Mexico

July 2021 - Present

- Synchronization (Node/TS/Redis): Reduced latency to <30ms via distributed caching for 2,000+ concurrent services and annual calendars
- Messaging Engine for 5k+ users (Twilio): Implemented direct navigation (deep-linking) to services
- Asset Management for 200+ companies (AWS S3): Implemented AES-256 encryption and versioning, ensuring 99.99% document integrity and availability
- Administrative Panel with advanced permissions (RBAC/PostgreSQL): Automated operations for 200+ companies, eliminating 85% of technical support tickets

Backend JavaScript Developer, [Adara](#), Merida, Mexico

- Backend Optimization (Node.js): Reduced latency by 30% and server load by 20% through refactoring and database query optimization (PostgreSQL/MongoDB)
- Payment Gateway (Conekta): Automated processing of >\$1M MXN monthly with 0% reconciliation errors via Webhooks and Application Programming Interface (API)
- Export (PDF/Excel): Mass report generation in <2s using Streams, reducing RAM consumption by 40%

Backend JavaScript Developer, [Petite Resort](#), Merida, Mexico

- Virtual Currency System (Node.js/Redis): Increased reserves by 25% through a digital wallet
- Financial Integration (PayPal API): Processed 100% of balance top-ups and package purchases with zero reconciliation errors through instant transaction validation
- Appointment Management: Eliminated time zone offset errors by standardizing to UTC, ensuring 100% accuracy in global schedules

Full Stack .NET Developer, [Preparatoria Hunucmá](#), Hunucmá, Mexico

December 2020 - June 2021

- Payment Management (ASP.NET/MySQL): Automated school billing using Stored Procedures, achieving 100% transactional integrity and reducing server load
- School Automation (C#/SQL Server): Teacher evaluation system and assignment of groups and grade changes
- Printing Engine: Developed generation of tickets, schedules, and teacher evaluation reports

Additional Experience

Full Stack JavaScript Developer, Yobain, Merida, Mexico

January 2020 - June 2020

Full Stack PHP Developer, Referral, Santiago, Chile

March 2019 - September 2019

Education

Metropolitan Technological University, Merida, Mexico

- Bachelor of Science in Computer Science
- Associate of Applied Science (A.A.S.) in Computer Information Systems

September 2019 - July 2021

September 2017 - October 2019
